Behavior Extraction and Analysis Tool

Version: 6.0

Commit: https://github.com/flopez141414/Beat-Team-12

Date: 12/02/2019

Third party software:

       Radare2 3.2.1

       MongoDB 4.2

       Jinja 2.2.10

The BEAT software is a tool designed to provide the capability to conduct a targeted binary analysis, with the added capacity to modify contents of plugins via a graphical user interface.
